

FEATURES

- The mixer is used with small size tank (100–500 Lt).
- The gear box (lubrification free) is coupled to the tank fixing flange.
- The main axis is made in stainless steel and covered in PVC.
- The seal against chemical vapour is a Fluorocarbon rotary seal inserted between the flange and the PVC cover of the shaft. This protects the gear box and the motor from chemical vapour.

EMEC supplies MIX with three different speeds: 65 RPM, 400 RPM and 1400 RPM.

The MIX shaft length can be customized to fit different size tanks.
